

FRP Products

**Simple
Effective
Safe**

A corrosion resistant product to a broad range of chemicals. Long life span with minimal maintenance, suitable in areas where either salt or freshwater are present and non harmful to marine life.

FRP grating is ideally suited for mine sites, chemical plants and numerous other applications. The use of fibreglass grating virtually eliminates maintenance costs since painting is not required, and UV inhibitors protect against degradation from the sun.

The standard colour is black/grey, but we can match any colour in Pantone range.

We can supply or supply and install all products. For information about our full product range visit us at benchmark-is.com.au

Surface features

- Concave
- Smooth
- Diamond top cover
- Gritted top cover
- Gritted
- Mini mesh surface
- Micro mesh surface
- Heavy duty

Industries

- Marine
- Mining
- Railway
- Wetlands
- ECO areas
- Roof and tower walkways

Functions

- Anti-slip floor, stair tread
- foot bridge
- Security and safety
- fence handrail
- Non-conductive and non-magnetic

Advantages

- Anti-fire
- Anti-corrosion and anti-aging
- Light but high loaded strength
- Easy installation and rich colours
